-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

Claims 3, 4, and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 3 and 4 “the at least one oxidation process” lacks clear antecedent basis. Claim 4 appears to be a duplicate of claim 3 because “the at least...step (b)” is included in claim 1. In claim 6 “claim 2” is erroneous.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over McLaughlin et al. in view of Allen et al. 6,428,705. McLaughlin et al. disclose (see col. 3 line 46 through col. 4 line 62) a method of treating dredged material substantially as claimed. The claims differ from McLaughlin et al. by reciting a step for subjecting the dredged material to an oxidation process. Allen et al. disclose (see col. 3 line 52 through col. 7 line 17) that it is known in the art to add oxidizing agents to dredged material to aid in removing metals and organic materials by filtration. It would have been obvious to one skilled in the art to modify the method of McLaughlin et al. by utilizing the recited oxidation process in view of the teachings of Allen et al., to aid in removing metals and organic material from the dredged material. The specific oxidizing agent utilized would have been an obvious matter of process optimization to one skilled in the art, depending on the specific dredged material treated and results desired, absent a sufficient showing of unexpected results. With regard to claim 9, it is submitted that the

polymeric coagulants and flocculants disclosed in Allen et al. are considered patentably indistinguishable from the recited polyelectrolyte.

Applicant's arguments have been carefully considered but are not deemed pertinent to the above rejections.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
